

mobileFloww **Product information**

Patent pending

How it works

The mobileFloww has been specially developed to help protect and maintain the natural energy of the human system while using a mobile phone.

The mobileFloww was developed in accordance with the principle of resonance. Among other things it consists of a circuit of electronic components that respond to the radiation emitted by a mobile phone. The mobileFloww resonates with the radiation as it were. In doing so the mobileFloww creates a subtle but distinct field that is 'fed' by the radiation emitted by the mobile phone. This field, which we call a Floww Field, serves to offset the possibly harmful radiation.

Floww Field

With the flowing waves of the Floww Field created by the mobileFloww we want to neutralise the often angular or blocked radiation and in doing so help to maintain a sense of ease and vitality in the body.

mobileFloww as an addition to other Floww products

The mobileFloww was developed to be used in addition to the homeFloww set and the pocketFloww, but it can also be used on its own. The mobileFloww is an essential additional device because a mobile phone is a source of radiation that people:

1. are exposed to repeatedly, and
2. the distance between the radiation source and the user is very small.

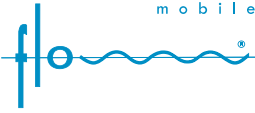

The mobileFloww creates a distinct Floww Field around the radiation source.

Range

The mobileFloww has a range of 50 centimetres around the mobile phone.

mobileFloww

mobileFloww **Instructions for use**

- The mobileFloww has a self-adhesive backing and can simply be stuck on the back of a mobile phone.
- For optimal effect the mobileFloww needs to be as close as possible to the built-in antenna. Your mobile phone manual will show the position of the antenna.
- The mobileFloww can also be stuck on the back of a cordless telephone. When stuck on a cordless telephone, the mobileFloww needs to be as close as possible to the antenna that receives the signal from the base station. The manual that came with your cordless telephone will show the position of the antenna.
- When using your mobile phone, we recommend that you use the speaker function whenever possible.

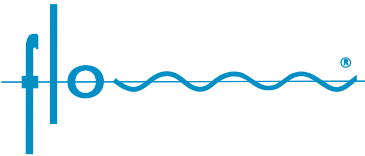

Withdrawal symptoms

- During the first week some people experience so-called 'withdrawal symptoms', which can include mild headaches or nausea. We believe that this is because the body is no longer being exposed to the distorted frequencies that it has become accustomed to. If these symptoms persist for more than a week please contact the Floww Company or a therapist associated with the Floww Company.
- When you first start using the mobileFloww make sure you drink enough (spring or mineral) water. Adults should drink at least 1.5 litres of water per day. Children over the age of 12 should drink a litre of water per day.

More advice on how to use the mobileFloww and details of the guarantee

More advice on how to use the mobileFloww, details of the guarantee, our brochure and instructions on how to use all of the Floww products can be found on and downloaded from our website, www.geohealth.gr
